NEWTECH INSULATION

Soundproof Walls NSV3-P

Lightweight industrial Soundproof Walls model "NSV3-P"

Designed for noise reduction in both indoor and out-door applications, soundproof walls "NSV3-P" can be attached to steel structures or scaffolding tubes. As a result, soundproof walls "NSV3-P" can save installation time and tremendously reduce structural costs. Made from non-flammable material with a waterproof coating that is weather resistant, soundproof walls "NSV3-P" are suitable for reducing mid to high-frequency noise. When installed as an open-top I-Shape wall, soundproof walls "NSV3-P" can reduce noise by 5-6 dBA. (depending on the wall height)

Features

- Ability to reduce noise by 5-10 dBA (depending on model and thickness)
- Lightweight makes it easy to transport and quick to install
- Ready to use and comes with pre-drilled holes for attaching "NSV3-P" to the structure
- UV and chemical resistance, suitable for both outdoor and indoor use
- Easy to disassemble for maintenance and quick to reassemble
- Choose a standard size or order a custom size
- Made of waterproof material, non-flammable, ability to reuse multiple times

Applications

- Steam turbines
- Air compressors
- Industrial fans
- Root blowers
- Pipe and valves
- Production lines
- Cutting machines
